

Remington Historic Freight Depot Project

**PHASE ONE,
PART FOUR:
MOVING
THE DEPOT
APRIL 2015**

Remington Historic Freight Depot

April 27, 2015

Ayers House Movers of Fredericksburg completes the process of supporting the building with a network of steel beams. Jason Ayers checks a small shim.

Freight Depot Depot Move April 27, 2015

Final preparations are made at the depot's new site, including a gravel base between the piers.

Freight Depot Preparation April 28, 2015

Ready to go!

Freight Depot Move April 29, 2015

The depot rolls across
Main Street,
Remington, driven by
Jason Ayers (in yellow
safety vest) using a
remote control.

Freight Depot Move April 29, 2015

The building clears
Main Street, but must
pause to allow safe
passage of a Norfolk
Southern freight train.

Freight Depot Move April 29, 2015

Ready to turn and cross
the spur track, leaving
Norfolk Southern's
right-of-way for good.

Freight Depot Move April 29, 2015

Crossing the spur tracks
with the wheels rolling
over steel plates.

Once off the right-of-
way, the depot travels
across a back yard.

Freight Depot Move April 29, 2015

After the back yard, the
Groves Hardware
lumberyard is navigated
through.

Freight Depot Move

April 29, 2015

Crossing the ditch,
which was temporarily
filled with steel beams.

We wish to thank Bryan
Hughey, Carl Faller,
and Paul Groves for
allowing the freight
depot to cross their
respective properties.

To be continued...
